

Bearcat Event Management System Storyboard

Login/Registration Screen

- Allows users (both university staff and students) to log in or register. It provides authentication options and third-party OAuth integration (e.g., Microsoft OAuth).

Dashboard Screen

- Admin/Staff can view event statistics, manage events, and create new ones. Students can view registered events and receive notifications about upcoming events.

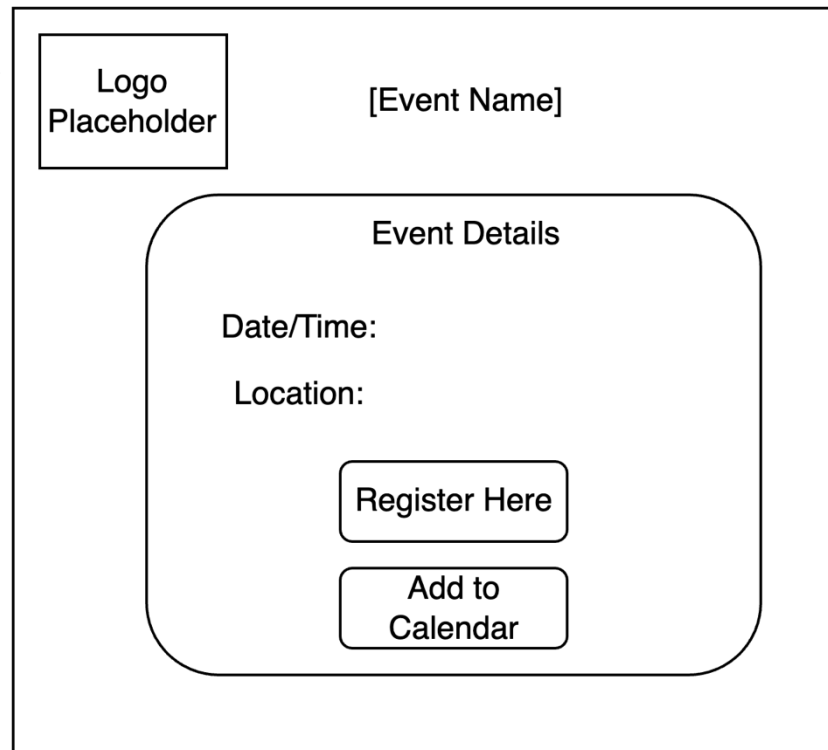

Event Listing/Search Screen

- Allows users to browse and search for events by category, date, or location. Provides filtering and integration with maps for event locations.

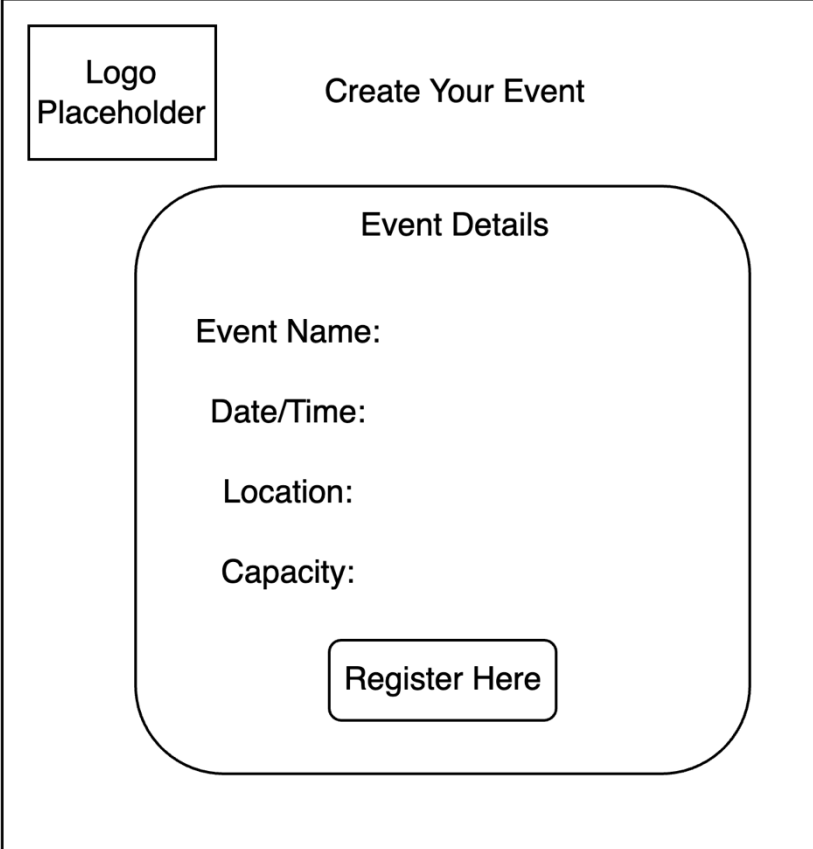

Event Detail Screen

- Shows detailed information about a selected event, including registration options, date, time, location, and the ability to add events to calendars.

Event Creation/Editing Screen

- Admin/Staff can create or edit event details, including descriptions, capacity, date, and location.

The image shows a wireframe of an event creation or editing screen. It features a main container with a header area and a central form area. The header area includes a logo placeholder and a title. The central form area is titled 'Event Details' and contains four input fields for event information, followed by a 'Register Here' button.

Event Registration Management Screen

- Allows Admin/Staff to view and manage registrations, send messages to participants, and view registration statistics.

The image shows a wireframe of a web application interface for event registration management. It features a main container with a header area and a central content area. The header area includes a 'Logo Placeholder' box on the left and 'Your Event Details' text on the right. The central content area is a rounded rectangle titled 'Event Details' containing labels for 'Participant Number:', 'Date/Time:', and 'Location:'. Below these labels are two buttons: 'Send Notification' and 'Register Here'.

My Events Screen (Students)

- Students can view their registered and past events, manage event participation, and cancel registrations.

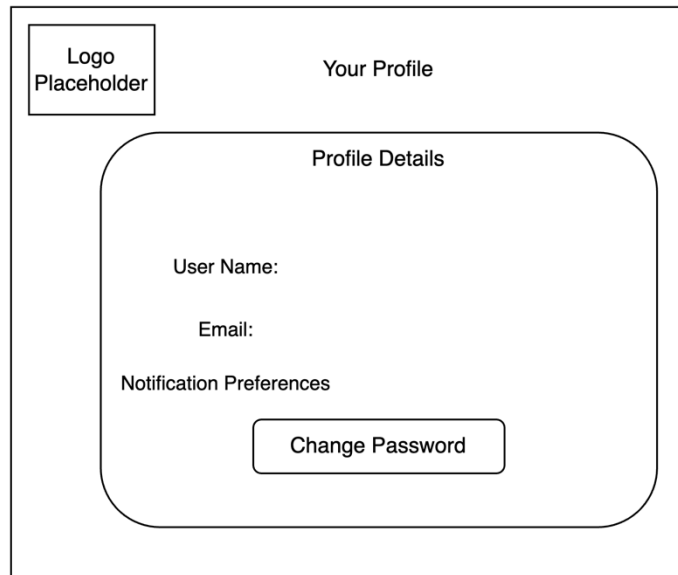

Notifications/Announcements Screen

- Displays important notifications such as event cancellations, reminders, and announcements for upcoming events.

Profile Management Screen

- Users can manage their profile details, set preferences for event notifications, and update information like email or password.

The wireframe illustrates a 'Profile Management Screen'. It features a main container with a 'Logo Placeholder' in the top-left corner. The title 'Your Profile' is centered at the top. Below the title is a large rounded rectangle labeled 'Profile Details'. Inside this rectangle, the labels 'User Name:', 'Email:', and 'Notification Preferences' are stacked vertically. A 'Change Password' button is positioned at the bottom right of the 'Profile Details' section.
